

**TABLE OF CONTENTS Manual No. 3**  
Reinforcing Concrete Structures with Fibre Reinforced Polymers

---

|          |   |      |
|----------|---|------|
| <b>1</b> | <b>Preface</b>  |      |
| 1.1      | Preface .....   | 1.1  |
| <b>2</b> | <b>ISIS CANADA</b>  |      |
| 2.1      | Overview .....  | 2.1  |
| 2.2      | Research Program.....                                     | 2.1  |
| 2.3      | Teaching Activities .....                                 | 2.3  |
| <b>3</b> | <b>USING THIS MANUAL</b>                                  |      |
| 3.1      | General Requirements.....                                 | 3.1  |
| 3.2      | Drawings and Related Documents .....                      | 3.1  |
| 3.3      | Code References .....                                     | 3.1  |
| <b>4</b> | <b>FRP REINFORCING MATERIALS</b>                          |      |
| 4.1      | Definitions .....   | 4.1  |
| 4.2      | General .....   | 4.1  |
| 4.3      | FRP Constituents.....                                     | 4.2  |
| 4.3.1    | Fibres .....  | 4.2  |
| 4.3.2    | Resins.....   | 4.4  |
| 4.4      | FRP Reinforcing Products and Material Properties.....     | 4.4  |
| 4.4.1    | Manufacturing Process.....                                | 4.5  |
| 4.4.2    | Coefficient of Thermal expansion of FRP .....             | 4.6  |
| 4.4.3    | Effect of High Temperature .....                          | 4.6  |
| 4.4.4    | Bond Properties of FRP Reinforcing Bars .....             | 4.7  |
| 4.4.5    | Fatigue of FRP Reinforcing Bars .....                     | 4.7  |
| 4.4.6    | Creep and Relaxation of FRP Reinforcing Bars .....        | 4.8  |
| 4.5      | Durability of FRP Reinforcing Bars .....                  | 4.8  |
| 4.6      | Commercially Available Reinforcing Bars .....             | 4.9  |
| 4.6.1    | Glass Fibre Reinforced Polymer Products .....             | 4.9  |
| 4.6.2    | Carbon Fibre Reinforced Polymer Products.....             | 4.14 |
| 4.6.3    | Aramid Fibre Reinforced Polymer Products.....             | 4.16 |
| 4.6.4    | Hybrid Fibre Reinforced Polymer Products .....            | 4.16 |
| <b>5</b> | <b>DESIGN PROCESS</b>                                     |      |
| 5.1      | Definitions .....   | 5.1  |
| 5.2      | Limit States Design.....                                  | 5.1  |
| 5.3      | Load Factors and Loading Combinations for Buildings ..... | 5.1  |
| 5.3.1    | Load Combinations.....                                    | 5.2  |
| 5.3.2    | Load Factors.....   | 5.3  |
| 5.3.3    | Importance Factor .....                                   | 5.3  |
| 5.3.4    | Resistance Factors.....                                   | 5.3  |
| 5.4      | Load Factors and Loading Combinations for Bridges .....   | 5.3  |
| 5.4.1    | Load Combinations .....                                   | 5.4  |
| 5.4.2    | Resistance Factors.....                                   | 5.5  |
| 5.5      | Constitutive Relationships for Concrete .....             | 5.5  |
| 5.5.1    | Tensile Strength .....                                    | 5.5  |
| 5.5.2    | Compressive Behaviour .....                               | 5.5  |

---

Table of Contents  
Reinforcing Concrete Structures with Fibre Reinforced Polymers

|       |  |     |
|-------|--|-----|
| 5.5.3 | Modulus of Elasticity .....                          | 5.7 |
| 5.6   | Constitutive Relationship for FRP .....              | 5.8 |
| 5.6.1 | Tensile Strength and Modulus of Elasticity.....      | 5.8 |
| 5.6.2 | Compressive Strength and Modulus of Elasticity ..... | 5.9 |

**6 DESIGN FOR FLEXURE**

|       |   |      |
|-------|---|------|
| 6.1   | Definitions .....   | 6.1  |
| 6.2   | General .....   | 6.1  |
| 6.3   | Strain Compatibility.....                                       | 6.2  |
| 6.4   | Modes of Failure .....  | 6.2  |
| 6.4.1 | Balanced Failure Reinforcement Ratio.....                       | 6.2  |
| 6.4.2 | Failure Due to Crushing of Concrete.....                        | 6.5  |
| 6.4.3 | Tension Failure.....  | 6.7  |
| 6.5   | Cracking Moment.....  | 6.10 |
| 6.6   | Minimum Flexural Resistance.....                                | 6.10 |
| 6.7   | Beams with FRP Reinforcement in Multiple Layers.....            | 6.11 |
| 6.8   | Beams with Compression Reinforcement .....                      | 6.11 |
| 6.9   | Examples.....   | 6.11 |
| 6.9.1 | Analysis of a Rectangular Beam with Tension Reinforcement ..... | 6.11 |

**7 SERVICEABILITY LIMIT STATES**

|         |   |      |
|---------|---|------|
| 7.1     | Definitions .....   | 7.1  |
| 7.2     | General .....   | 7.1  |
| 7.3     | Cracking.....   | 7.2  |
| 7.3.1   | Crack Width.....  | 7.3  |
| 7.3.2   | Permissible Crack Width .....   | 7.4  |
| 7.4     | Deflection.....   | 7.4  |
| 7.4.1   | Minimum Thickness of Members Reinforced with FRP .....                        | 7.4  |
| 7.4.2   | Examples for Determining Minimum Thickness and Span-to-Deflection Ratio ..... | 7.6  |
| 7.4.2.1 | Minimum Thickness of One-Way Slab Reinforced with FRP .....                   | 7.6  |
| 7.4.2.2 | Verification of Span-to-Deflection Ratio.....                                 | 7.6  |
| 7.4.3   | Effective Moment of Inertia Approach.....                                     | 7.7  |
| 7.4.4   | Curvature Approach.....   | 7.9  |
| 7.4.5   | Deflection Under Sustained Load.....  | 7.10 |
| 7.4.6   | Permissible Deflection .....  | 7.10 |
| 7.5     | Example of Deflection Calculation.....  | 7.11 |

**8 DEVELOPMENT, ANCHORAGE AND SPLICING OF REINFORCEMENT**

|     |                                       |     |
|-----|---------------------------------------|-----|
| 8.1 | Definitions .....                     | 8.1 |
| 8.2 | General .....                         | 8.1 |
| 8.3 | Development Length and Anchorage..... | 8.1 |
| 8.4 | Splicing of FRP Reinforcement.....    | 8.2 |

**9 DEFORMABILITY**

|     |                    |     |
|-----|--------------------|-----|
| 9.1 | Definitions .....  | 9.1 |
| 9.2 | Deformability..... | 9.1 |

Table of Contents  
Reinforcing Concrete Structures with Fibre Reinforced Polymers

|           |  |       |
|-----------|--|-------|
| <b>10</b> | <b>CHARTS FOR FLEXURAL DESIGN</b>                                    |       |
| 10.1      | Definitions .....  | 10.1  |
| 10.2      | Design Aids for Rectangular Concrete Sections.....                   | 10.1  |
| 10.3      | Concepts Used for the Design Charts.....                             | 10.1  |
| 10.3.1    | Group A Curves.....  | 10.1  |
| 10.3.2    | Group B Curves.....  | 10.2  |
| 10.3.3    | Group C Curves.....  | 10.4  |
| 10.4      | Use of Design Charts.....  | 10.4  |
| 10.4.1    | Design Example.....  | 10.5  |
| 10.5      | Design Charts.....   | 10.7  |
| <b>11</b> | <b>SHEAR DESIGN</b>  |       |
| 11.1      | Definitions .....  | 11.1  |
| 11.2      | General .....  | 11.1  |
| 11.3      | Modes of Failure .....   | 11.2  |
| 11.4      | Beams Without Web Reinforcement.....                                 | 11.2  |
| 11.5      | Beams with FRP Web Reinforcement .....                               | 11.3  |
| 11.5.1    | Types of FRP Stirrups.....   | 11.3  |
| 11.5.2    | Detailing of FRP Stirrups .....                                      | 11.3  |
| 11.5.3    | Minimum Amount of Shear Reinforcement .....                          | 11.4  |
| 11.5.4    | Maximum Strain in FRP Stirrups.....                                  | 11.5  |
| 11.6      | Shear Resistance of FRP Reinforced Beams.....                        | 11.5  |
| 11.7      | Shear Design Example.....  | 11.6  |
| 11.8      | Shear Resistance of FRP Reinforced Beams Using Shear Friction .....  | 11.9  |
| 11.8.1    | Fundamentals .....   | 11.9  |
| 11.8.2    | Design Procedure for Use in Regions of Uniform Stirrup Spacing ..... | 11.10 |
| 11.8.3    | Design Example.....  | 11.12 |
| <b>12</b> | <b>PLACEMENT OF REINFORCEMENT AND CONSTRUCTABILITY</b>               |       |
| 12.1      | Definitions .....  | 12.1  |
| 12.2      | Spacing of Longitudinal Reinforcement .....                          | 12.1  |
| 12.3      | Concrete Cover .....   | 12.2  |
| 12.4      | Constructability .....   | 12.2  |
| <b>13</b> | <b>CASE STUDIES</b>  |       |
| 13.1      | Crowchild Bridge, Alberta.....                                       | 13.1  |
| 13.2      | Hall's Harbour Wharf, Nova Scotia.....                               | 13.1  |
| 13.3      | Joffre Bridge, Québec .....  | 13.2  |
| 13.4      | Taylor Bridge, Manitoba.....   | 13.3  |
| <b>14</b> | <b>NOTATION</b>  |       |
| 10.1      | Notation.....  | 14.1  |
| <b>15</b> | <b>GLOSSARY</b>  |       |
| <b>16</b> | <b>REFERENCES</b>  |       |
