

## TABLE OF CONTENTS Manual No. 4

### Strengthening Reinforced Concrete Structures with Externally-Bonded Fibre Reinforced Polymers

---

1	Scope	1.1
	1.1 General Requirements	1.1
	1.2 Drawings and Related Documents	1.1
2	Properties of FRPs	2.1
3	Evaluation of Existing Structures	3.1
	3.1 General	3.1
	3.2 Existing Capacity and Conditions	3.1
	3.3 Concrete Surface	3.2
	3.4 Causes of Deficiencies	3.2
4	Beam and One-Way Slab Strengthening	4.1
	4.1 Definitions	4.1
	4.2 Assumptions	4.4
	4.3 Mechanical Properties of Materials	4.5
	4.3.1 Concrete	4.5
	4.3.2 Steel	4.6
	4.3.3 FRPs	4.6
	4.4 Equivalent Concrete Stress Block	4.6
	4.5 Flexural Members	4.8
	4.5.1 Resistance Factors	4.8
	4.5.2 Flexural Failure Modes	4.8
	4.5.3 Rectangular Beams	4.9
	4.5.3.1 <i>Steel reinforcement in tension</i>	4.9
	4.5.3.2 <i>Design example 4.1</i>	4.12
	4.5.3.3 <i>Design example 4.2</i>	4.14
	4.5.3.4 <i>Design example 4.3</i>	4.16
	4.5.3.5 <i>Steel reinforcement in tension and compression</i>	4.17
	4.5.3.6 <i>Design example 4.4</i>	4.21
	4.5.3.7 <i>Design example 4.5</i>	4.23
	4.5.4 T-beams	4.25
	4.5.4.1 <i>Design principles</i>	4.25
	4.5.4.2 <i>Design example 4.6</i>	4.27
	4.5.4.3 <i>Design example 4.7</i>	4.30
	4.6 Shear	4.33
	4.6.1 Initial Requirements	4.33
	4.6.2 Resistance Factors	4.34

---

4.6.3	Design Principles	4.34
4.6.4	Strengthening Limits	4.37
4.6.4.1	<i>Maximum strengthening</i>	4.37
4.6.4.2	<i>Minimum strengthening</i>	4.37
4.6.5	Anchorage	4.38
4.6.6	Design Examples	4.38
4.6.6.1	<i>Design example 4.8 – rectangular beam</i>	4.38
4.6.6.2	<i>Design example 4.9 – T-beam</i>	4.40
4.7	Anchorage and Development Lengths	4.43
4.7.1	Design Example 4.10 – Development Length	4.44
4.8	Serviceability Limit States	4.45
4.8.1	Deflections	4.45
4.8.2	Vibrations	4.46
4.8.3	Creep	4.46
4.8.4	Fatigue	4.47
5	Column Strengthening	5.1
5.1	Definitions	5.1
5.2	Short Circular Columns in Pure Compression	5.3
5.2.1	Confinement	5.3
5.2.2	Confinement Limits	5.4
5.2.3	Axial Load Resistance	5.5
5.2.4	Design Example 5.1	5.5
5.3	Short Rectangular Columns in Pure Compression	5.7
5.3.1	Confinement	5.8
5.3.2	Confinement Limits	5.9
5.3.3	Axial Load Resistance	5.9
5.3.4	Design Example 5.2	5.9
5.4	Shear Strengthening	5.11
5.4.1	Shear Capacity	5.11
5.4.2	Confinement Limits	5.12
5.4.3	Strength Calculation for Columns with Circular Cross-Section	5.12
5.4.4	Design Example 5.3: Shear Strength Calculation	5.13
5.4.5	Strength Calculation for Columns with Rectangular Cross-Section	5.15
5.4.6	Design Example 5.4	5.16
5.5	Strengthening Limits for Axial Load Capacity	5.17
5.5.1	Creep	5.17
5.5.2	Fatigue	5.17
5.5.3	Design Example 5.5	5.18

6	Typical Specifications	6.1
6.1	General	6.1
6.2	Definitions	6.1
6.3	Approval of FRP Materials	6.1
6.3.1	Descriptive Specifications Prepared by the Engineer	6.1
6.3.2	Performance Specifications Prepared by the Engineer	6.2
6.3.3	Specifications Prepared by the Contractor	6.2
6.4	Handling and Storage of FRP Materials	6.2
6.4.1	General	6.3
6.4.2	Shipping	6.3
6.4.3	Storage	6.3
6.4.3.1	<i>Storage conditions</i>	6.3
6.4.3.2	<i>Shelf life</i>	6.3
6.4.4	Handling	6.4
6.4.4.1	<i>General handling hazards</i>	6.4
6.4.4.2	<i>Personnel safe handling and clothing</i>	6.4
6.4.4.3	<i>Workplace safe handling</i>	6.4
6.4.5	Clean-up and Waste Disposal	6.5
6.5	Staff Qualifications	6.5
6.6	Concrete Surface Preparation	6.5
6.6.1	General	6.5
6.6.2	Dry Conditions	6.6
6.6.2.1	<i>Repair of existing substrate</i>	6.6
6.6.2.2	<i>Surface preparation for flexural or shear reinforcement</i>	6.6
6.6.2.3	<i>Surface preparation for confinement</i>	6.7
6.6.3	Particular Conditions	6.7
6.7	Installation of FRP Systems	6.8
6.7.1	Preparation and Climatic Conditions	6.8
6.7.1.1	<i>Equipment</i>	6.8
6.7.1.2	<i>Temperature, humidity and moisture concerns</i>	6.8
6.7.1.3	<i>Mixing of resins</i>	6.8
6.7.2	General Installation Procedures	6.9
6.7.2.1	<i>Primer and putty</i>	6.9
6.7.2.2	<i>Hand-applied wet lay-up systems</i>	6.9
6.7.3	Particular Installation Procedures	6.10
6.7.3.1	<i>Pre-cured systems</i>	6.10
6.7.3.2	<i>Alignment of FRP materials</i>	6.10
6.7.3.3	<i>Multiple plies and lap joints</i>	6.11
6.8	Cure	6.11
6.9	Protection and Finishing	6.11

---

7	Quality Control and Quality Assurance	7.1
7.1	General	7.1
7.2	Material Qualification and Acceptance	7.1
7.3	Qualification of Contractor Personnel	7.1
7.4	Inspection of Concrete Substrate	7.1
7.5	FRP Material Inspection	7.2
7.5.1	Before Construction	7.2
7.5.2	During Construction	7.2
7.5.3	At Completion of the Project	7.2
7.5.3.1	<i>Delaminations</i>	7.3
7.5.3.2	<i>Cure of systems</i>	7.3
7.5.3.3	<i>Adhesion</i>	7.3
7.5.3.4	<i>Laminate thickness</i>	7.3
7.5.3.5	<i>Material properties</i>	7.4
7.6	Testing	7.4
7.6.1	Qualification Testing	7.4
7.6.2	Field Testing	7.4
8	Glossary	8.1
9	References	9.1
	Appendix A Resources	A.1
	Appendix B Design Charts for Flexural Strengthening	B.1
